

WORK & EDUCATION

Creative Circle

Freelance Designer
February 2015 - Present

I am currently represented by Creative Circle as a graphic designer that is ready for any job. Big or small, long or short, I am willing to take on any task in the design world.

La Fontaine de Chocolate

Web Designer & Food Services
January 2015 - Present

I am currently in charge of designing and maintaining their website, brand, and any advertising they need. I am also working events with them, which involves dealing with people face to face and keeping a clean working environment.

TMP Worldwide

Art Director
August 2014 - January 2015

I was the Art Director for the Wal-Mart career recruitment account. While at this position I worked on redesigning the Wal-Mart Careers website, social media content, print work, and a job finder app. I worked closely with my creative directors and our account team to make sure that everything was up to par for such a large company.

NES World Group

Account Manager & Graphic Designer
November 2013 - June 2014

I managed and worked face to face on multiple accounts at the same time. I also was doing all of the design work for these accounts. This included web and print work, advertising, social media content, and branding.

Central Michigan University

Bachelor of Fine Arts, Graphic Design Concentration
May 2013

I graduated in 2013 with a Bachelor of Fine Arts degree from Central Michigan University. Their design program only accepts 15-20 students a semester, so getting in was a great personal achievement for me.

Stony Creek Metropark

Maintenance Work
2011 - 2013 (Summers)

I worked at Stony Creek Metropark during the summers when I came home from college. My duties were to keep the 4,500 acre park clean and safe for guests.

GET TO KNOW ME

I am an ambitious designer fresh out of the Greater Detroit area with bright ideas, ready to unleash on the world. Overall I would like to use my understanding of design and my people skills to produce quality work for clients, whether its for a firm or private accounts. I also want to continue to learn and better myself as a graphic designer; while also using my **knowledge, education, creativity, and communication** to benefit my employer. I like to keep my skill set, both on and off the computer, as sharp as possible. I have a strong grasp on the Adobe and Microsoft products used in the design field, as well as a fine understanding for how computers work. When it comes to video and photography, I have experience in planning, shooting, and editing both for clients.

Sure I like designing stuff, but who is the man behind the keyboard. I am a 25 year old born and raised in Metro Detroit who enjoys the small things in life, like a quality soccer match, wearing a variety of different hats, and sunflower seeds (get it... "small things"). Oh yeah, and sometimes I make corny puns. After I got my Bachelors of Fine Arts at Central Michigan University in May 2013 I spent 8 months as an account manager at NES World Group. Last fall I moved to Chicago to work at TMP Worldwide as an art director, though I recently left that job. I am currently back in Metro Detroit working as a freelance designer with Creative Circle. I like to be in an environment with a good mix of playful and serious, having not enough of either can make things uncomfortable for all.
